Zurich, Switzerland

Eurosensors 2026 + Industry Session Exhibitor & Sponsor Kit

Sponsoring Eurosensors 2026 offers a valuable opportunity to gain visibility, showcase innovations, and connect with top researchers and industry leaders in sensor technology.

Strengthen your brand, foster collaborations, and stay at the forefront of cutting-edge advancements in the field.

Introducing Eurosensors 2026

We are excited to welcome you to Eurosensors 2026 in Zurich.

Eurosensors 2026 will mark the 38th edition of the conference series, which was first held in Cambridge in 1987. Since its inception, the conference has become the leading European platform covering the entire field of Sensors, Actuators, Microsystems, and Nanosystems. The event serves as an exceptional opportunity to bring together scientists and engineers from academia, research centers, and industry, fostering professional exchange and collaboration. The four-day event will

offer several parallel sessions and plenary talks, invited presentations, oral and poster presentations (evaluated by our international technical program committee), and an Industry Session. There will also be various awards recognizing outstanding contributions. Each year, Eurosensors attracts an international audience of more than 500 participants. In addition to the main conference, Eurosensors 2026 will host the inaugural Hackathon (replacing the Eurosensors School).
